Animal Research Tomorrow is the new host of the Basel Declaration

https://animalresearchtomorrow.org

Animal Research 2020 and Beyond

is organised on the occasion of the

10th Anniversary of the *Basel Declaration*

November 29, 2010

A Special Welcome to Mike Hengartner
Stefan Treue
(First Signatories with D. Imboden)

Astrid Kugler (Founding Manager)

The BASEL DECLARATION

A call for more trust, transparency and communication in animal research Adopted in Basel on November 29, 2010

- Signatories from over 60 countries have committed to perform Research involving Animals:
 - 1. Adhering to the Highest Technical and Ethical Standards
 - 2. Strictly Implementing the 3Rs Principles
- In addition they commit to:
 - 3. Promote Open Access to all Primary Data
 - 4. Improve Education at all Levels
 - 5. Engage in Open, Transparent and Proactive Communication with the Public, Law Makers, Funding Agencies & Animal Welfare Organizations
 - 6. Inform Stakeholders about the continued Necessity of Animal Research for Basic and Applied Research
 - The Signatories request that their Engagement must be supported by their Host Institutions

2011-2020: The Basel Declaration Society

Yasha

Home of the Basel Declaration

- The BDS is decidated to Spreading and Implementing the Principles of the Basel Declaration
- The Voice for Ethically Responsible Animal Research
- Researchers for Researchers: Support, Education, Media Training,
 Conferences, Networking with National Organisations
- International Grass-Root Organization with an Efficient Low Cost Structure

The Basel Declaration is a Global Network

- ~5000 Signers of the Basel Declaration from over 60 Countries
- ~20 Institutional Signers and Members
- ~ 220 Ambassadors worldwide
- Collaborations with EFPIA, EARA and National Organizations

Basel Declaration Society I Alischwilerplatz 1 | PF | CH-4009 Basel 4th INTERNATIONAL CONGRESS OF THE BASEL DECLARATION SOCIETY:

Research on animals in the frontline: Transparency and public engagement

Rome, 1st - 2nd October 2015

Human health is benefiting enormously from continuous medical progress. This is made possible by the interactions between basic blomedical research, translational research and the development of new drugs and therapies. The incredible advances of biomedical research during the last few decades would not have been possible without the ground-breaking research done in various animal models, ranging from simple invertebrates to non-human primater order to continue to contribute scientific discoveries that will benefit human health, it is absolutely critical that state the-art basic as well as applied research can continue

A small, but very active and influential fraction of the general public sees this rather differently and poses a threat modern biomedical research. They are very vocal in promoting the claim that research involving animals is useless unnecessary or even harmful to medical progress and improvement of human health. This anti-scientific attitude misrepresents the scientific and historic evidence as well as the ethical challenge of our dual responsibility towar human patients and research animals.

5TH INTERNATIONAL CONFERENCE OF THE BASEL DECLARATION SOCIETY

Openness and Transparency: **Building Trust in Animal Research**

14th – 15th February 2018 I at swissnex, Pier 17, San Francisco

Animal research has made key contributions to all fields of (bio-) medical and basic research. The welfare of research animals is guaranteed by the most restrictive rules that govern animal use by society. Nevertheless, the perception that animal research is cruel and does not contribute to improving human health and should therefore be replaced by

This underscores the need to improve communication on all aspects with the aim to increase public trust in animal research. However, calls for openness and transparency are often met with serious worries by scientists and research institutions alike. There is concern that increasing openness and transparency will provoke backlashes and trigger campaigns by

There is concern that increasing openness and transparency will provoke backlashes and trigger campaigns by

Grimm (2018) *Science*, doi:10.1126/science.aau5805

In February, about 100 U.S. scientists, veterinarians, and

university administrators gathered in San Francisco, California, to call for more transparency from the country's animal labs. One upshot: a proposed U.S. Animal Research Openness Agreement, which if formalized would bind signatories to be more candid about the animal

Good Things remain..

- The Basel Declaration pioneered the world-wide Promotion of Transparent Communication, Ethically Responsible Animal Experimentation and the 3Rs in the Life Sciences
- Animal Research Tomorrow is a Grass-Root NGO distinct from other Organisations
- Members are Academics/Scientists from Different Disciplines that inform transparently and support research involving animal experimentation – NOT a lobbying organization for animal testing

New Initiatives.....

- We will be an Independent Fact-based Source of Scientific Information
- We will develop a Think-Tank engaging with other Disciplines such as Ethics and Philosophy
- Reach-out to Patients and their Organisations
- Strengthen Interactions with Next Generation Scientists and Leaders (Gen Y-Millennials-Gen Z)

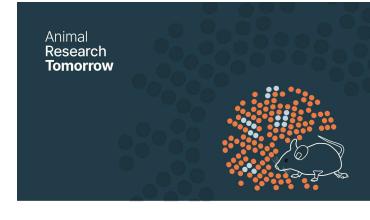

More than Rebranding- it's a Mission Statement

State-of-the-ART Animal Research is:

An Absolutely Essential Part of both Discovery and Translational Life Science Research

Ethical Responsibility, Best Practise Design and Methodology, Animal Welfare and Empathy

State-of-the-ART Animal Research is:

An Absolutely Essential Part of both Discovery and Translational Life Science Research

Ethical Responsibility, Best Practise Design and Methodology, Animal Welfare and Empathy

More than Rebranding- it's a Mission Statement

State-of-the-ART Animal Research is NOT stand alone but part of:

Holistic Approaches to Discover and Study the Complexity of Organismal Development & Functions and the Changes causing Disease

Integrative Systems Research based on Genome-wide, Cellular & *In Silico* Analysis of Complex Biological Processes

Innovation of Complementary/"Alternative" Cellular Approaches such as iPS Cells, Organoids etc

1. Society and Life Science Research

Strengthen the Ambassador Network by forming Active Regional Chapters

1. Society and Life Science Research

- Strengthen the Ambassador Network by forming Active Regional Chapters
- Reach-out to Patient Organizations, Advocacy Groups and Young Scientists
- Use Social Media and Digital Formats for Outreach and Education to Target Groups

1. Society and Life Science Research

- Strengthen the Ambassador Network by forming Active Regional Chapters
- Reach-out to Patient Organizations, Advocacy Groups and Young Scientists
- Use Social Media and Digital Formats for Outreach and Education to Target Groups
- Inform Society about the Moral Obligation of Scientists to conduct Research that includes Animals to the Benefit of Human and Animal Patients

2. Science and Research Practice

 Reduction/Replacement of Animal Research – what is scientifically justifiable and what not?

2. Science and Research Practice

- Reduction/Replacement of Animal Research what is scientifically justifiable and what not?
- Promote Efforts to improve Reproducibility and Validity of Research
- Promote Efforts to Guarantee the Highest Standards of Scientific Quality

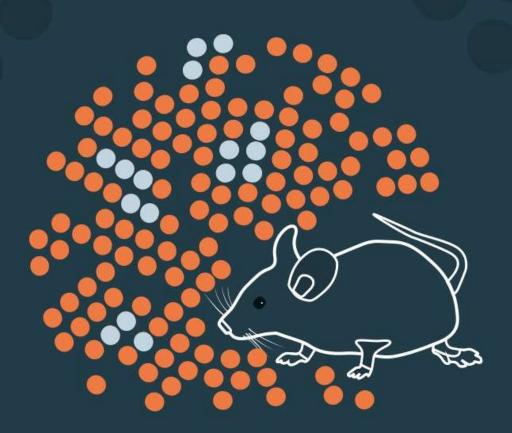

3. Ethics and Philosophy of Animal Research - a Think Tank Project

- Philosophical Basis of Arguments in favor (and against) Animal Research
- What are Philosophically valid Arguments for Animal Research.

3. Ethics and Philosophy of Animal Research - a Think Tank Project

- Philosophical Basis of Arguments in favor (and against) Animal Research
- What are Philosophically valid Arguments for Animal Research.
- A Moral Obligation of Scientists to use Animals -if required- in Discovery and Applied Life Science and Biomedical Research.
- Define an Ethical Decision Framework to assess the Justification of Animal Experimentation.

Thank you for your attention!

Dr. Nuno Franco (University of Porto)
